

Key Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

Class R shares of ADCB SICAV – ADCB Multi-Asset Aggressive Fund, a sub-fund of ADCB SICAV (ISIN LU2029627424)

Management Company: Fuchs Asset Management S.A.

Objectives and investment policy

The objective of the Sub-Fund is to achieve medium to long-term capital growth and a reasonable level of income by investing predominantly in units of open-ended funds (UCITS and other UCIs) and exchange traded funds including, where appropriate, other Sub-Funds of ADCB Sicav. The Sub-Fund may also, where appropriate, invest in other transferable securities and money market instruments including bonds and listed shares.

In considering the selection of underlying funds the Investment Manager will consider both quantitative measures (e.g., past performance, expected levels of risk and returns, expense levels, diversification and style consistency) and qualitative factors (e.g., organizational stability, investment experience, investment and risk management processes, and information, trading, and compliance systems). There are no minimum or maximum percentages of assets that the Sub-Fund must invest in a specific asset class or underlying fund.

The underlying funds invest in growth and value stocks of small, medium, and large market capitalization companies, fixed-income securities, global and regional (including those in emerging markets) securities, securities denominated in foreign currencies, investment companies (including index funds and ETFs), real estate securities, derivatives, and government and government-sponsored securities. The underlying funds engage in derivative transactions to gain exposure to a variety of securities or asset classes or attempt to reduce risk. A derivative is a financial arrangement, the value of which is derived from, or based on, a traditional security, asset, or market index. The underlying funds principally use futures, options, swaps (including, for example, credit default, interest rate, and currency swaps) and forwards. The Sub-Fund may, for the purpose of diversification, invest some of its assets in underlying funds that in turn invest in distressed securities, emerging market bonds and equities, and complex securities such as Cocos. Such allocations, however, would not represent a predominant investment strategy.

The Sub-Fund is actively managed. When constructing the Sub-Fund's portfolio, the Investment Manager will be guided by a composite of 20% Bloomberg Barclays Global Aggregate TR Hedged USD index, 65% MSCI ACWI NR USD Index and 15% HFRX Global Hedged Fund index. The investment strategy will restrict the extent to which the Sub-Fund's asset allocation may deviate from that of the composite to a maximum of 10% above or below the asset allocation weights of the composite. The Sub-Fund's investment universe is expected to overlap materially with the components of the composite.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw money within 3 years.

Risk and reward profile

Class R (USD)	1	2	3	4	5	6	7
					●		

This indicator is based on simulated historical data which may not be a reliable indication of the future risk profile of such class.

The categorisation of the class in the scale is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.
