CONCERTO IS - DAMAN MENA, class P USD d (LU2010457039)

a sub-fund of CONCERTO IS

Management Company: Fuchs Asset Management S.A.

Objectives and investment policy

Objectives

The Daman sub-fund's investment objective is to achieve medium to long-term capital appreciation with a high correlation to the MENA Region's broader markets by investing primarily in securities of issuers listed in the MENA Region or investing in securities of issuers listed outside of the MENA Region but deriving most of their revenues from the MENA Region. For these purposes, the MENA Region means the Greater Middle East (including Turkey and Pakistan) and North Africa region.

Investment policy

The Daman sub-fund will invest in listed equities, listed equity related securities, including but not limited to American Depositary Receipts (ADRs), Global Depositary Receipts (GDRs), equity swaps and participatory notes and initial public stock offering (IPOs) and debt instruments of issuers located in or deriving a significant portion of their revenues from the MENA Region, including debt instruments rated both as investment grade and below investment grade.

The Daman sub-fund may also use financial derivative investment although these will be limited to forwards and financial futures contracts used for hedging and efficient portfolio management purposes only.

The Daman sub-fund may invest up to 10% of its assets in ADRs/GDRs. The Daman Sub-Fund will not invest in ADRs/GDRs which have embedded

derivatives.

The Daman sub-fund may invest up to 60% of its assets in P-Notes. When investing in P-Notes, the Daman sub-fund will only invest in "Securitised Holding Abwab Market Access Listed (SHAMAL) Notes Programme" P-Notes which are listed on the Global Exchange Market of Euronext Dublin Exchange and qualify as transferable securities admitted to or dealt in on a regulated market within the meaning of Directive 2014/65/EU. For the avoidance of doubt, the Daman sub-fund will not invest in P-Notes which are not be listed on a regulated market or which are not listed.

The Daman sub-fund may invest up to 10% of its assets in contingent convertible instruments (CoCos).

The sub-fund is an absolute return fund actively managed on a discretionary basis without using a benchmark.

The currency of the share class is denominated in USD.

The investor may subscribe, convert and redeem shares on every Friday.

These shares are capitalisation shares. Income and capital gains are reinvested.

Recommendation

This sub-fund may not be appropriate for investors who plan to withdraw their money before 3 years.

Risk and reward profile

What does this synthetic indicator mean?

- The category 5 means a rather high risk and consequently rather high potential losses and gains.
- The risk category is based on historical and simulated data and may not be a reliable indication of the future risk profile. The risk and reward category shown, and the categorisation of the fund, may change and develop over time.
- The lowest category does not mean a risk-free investment.
- Repayment of the initial investment is not guaranteed.

Which materially relevant risks are not adequately captured by the synthetic indicator?

- The investment in shares bears an issuer risk insofar as the issuing company might go bankrupt. This may result in significant or even total losses of the value of the investments in these instruments.
- The investment in underlying funds implies that the sub-fund is exposed to 1) the investment risks borne by the underlying funds, 2) the risk of increases in the level of charges borne by the underlying funds and 3) the risk that the underlying funds limit or suspend the right for their investors to redeem.

- The use of financial derivative instruments that are not listed on a stock exchange or traded on another regulated market ("over-the-counter instruments") bears a counterparty risk in the sense that the sub-fund's counterparty for such instruments may find itself in a position where it is not able to honor all or part of their obligations towards the sub-fund.

- Risks related to leverage: financial derivative instruments can introduce leverage risks and lead to volatility.
- Risks related to investment in currencies: The fund's investments may be acquired directly or indirectly in other national currencies than its reference currency. This can have negative impact on the Fund depending on volatility in currency markets.
- Liquidity risk: the fund may invest in UCITS funds. However market conditions may have an impact on the prices at which the manager trades positions.
- Counterparty risk: the fund will invest in OTC derivatives for currency forward transactions only.
- Operational risks: the fund is subject to risks through operational or human error. The management company is monitored by independent internal and external auditors, as well as by the regulators.
