2. EXECUTION QUALITY ASSESSMENT (APPLICABLE TO ALL ASSET CLASSES)

a. Explanation on the relative importance we gave to the execution factors of price costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution

For all clients with standard order size and instruments with reasonable liquidity in the market, we prioritize the criterion of best price for our execution quality assessment. Execution cost factors are fairly similar in consideration of the type of instrument and market, according to our assessment.

In exceptional cases, where orders present above standard size or where orders concern illiquid instruments or markets, likelihood of execution is also considered as a criterion to assess execution quality.

b. Close links, conflicts of interests, and common ownerships with respect to any execution venues used to execute orders

Nihil

c. Specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received

Nihil

d. Factors that led to a change in the list of execution venues listed in our execution policy, if such change occurred

No change occurred during the reporting year.

e. Differences of order execution according to client categorisation, where we treat categories of clients differently and where it may affect the order execution arrangements

We do not apply different execution criteria according to the client categorisation. The only differentiating factors are related to size of orders and liquidity of markets.

f. Precedence given over immediate price and cost when executing retail client orders and degree of instrumentality of such criteria in delivering the best possible result in terms of the total consideration to the client

Precedence may be given to likelihood of execution over immediate price and cost in exceptional circumstances, such as execution of big-sized orders or orders on illiquid instruments. In any such cases, price and cost considerations would be purely theoretical as execution of orders would not be otherwise possible, and therefore the degree of impact in delivering the best possible result in terms of total consideration is deemed irrelevant.

g. Use of any data or tools relating to the quality of execution, including any data published under Delegated Regulation (EU) 2017/575

We use the BTCA tool of Bloomberg to monitor and analyse execution quality. This tool integrates information provided by execution venues under Delegated regulation (EU) 2017/575.

h. Use of output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU

We had no recourse to the services of a consolidated tape provider during the reporting year.
